PROFESSIONAL SUMMARY

I'm a software engineer with 3 years experience in developing applications for multiple domains like finance, e-Commerce, Business, Ride-Sharing. I am experienced in designing, developing and testing scalable mobile, web, backend applications across different platforms.

WORK EXPERIENCE

Software Engineer

Oct 2022 - Aug 2023 | Ciya Sarl, Remote | Part Time

- Developed and maintained mobile applications using modern mobile development technologies like Flutter, Dart, Firebase.
- Collaborated with cross-functional teams, including product managers and designers, to define project requirements and deliver high-quality software products.
- Debugged and resolved software defects and issues, improving product stability and reliability.

Mobile Application Developer

Oct 2021 - Present | Belcash Technology Solutions , Addis Ababa, Ethiopia

- Developed and maintained mobile and web applications using modern technologies like Flutter, Dart, Firebase, Flutter web, NextJs, React, NodeJS
- Implemented RESTful APIs to facilitate data exchange between the front-end and back-end systems.
- Worked on optimizing application performance, reducing load times, and enhancing the user experience.
- Implemented secure authentication and authorization features, including biometric authentication and OAuth.

PROJECTS

E-Wallet (iOS & Android)

Developed a credit management application, providing users to access their credits, receive and make payments. Integrated with RESTful APIs for real-time product updates and secure payment processing.

- **Technologies:** Flutter, Dart, RESTful APIs, Firebase
- **Project Link:** <https://play.google.com/store/apps/details?id=com.belcash.helloodube>

CIYA! (iOS & Android)

Developed a ride sharing app for iOS and Android, focusing on connecting users with driver and vice versa. Included features such as real-time messaging and notifications

- **Technologies:** Flutter, Dart, RESTful APIs, Firebase
- **Project Link:** <https://play.google.com/store/apps/details?id=io.ciya>, <https://apple.co/3tv6ag0>
- **Project Link:** <https://play.google.com/store/apps/details?id=io.ciya.driver>

Corporate E-Wallet (iOS & Android)

Designed and developed a cross-platform e-commerce payment application, providing users with a seamless payment and shopping experience. Integrated with RESTful APIs for real-time product updates and secure payment processing.

- **Technologies:** Flutter, Dart, RESTful APIs, Firebase
- **Project Link:** https://play.google.com/store/apps/details?id=com.belcash.hellopay_corporate
- **Project Link:** https://play.google.com/store/apps/details?id=com.belcash.hellomarket_sales_wallet
- **Project Link:** https://play.google.com/store/apps/details?id=com.belcash.hello_supplier
- **Project Link:** <https://apps.apple.com/us/app/hellopay-corporate/id6444025766>
- **Project Link:** <https://apps.apple.com/us/app/hellopay/id1639542204>

Voucher Wallet as a Service (iOS & Android)

Designed and developed a cross-platform payment application, providing merchants a wallet with e-commerce feature embedded in it. Integrated with RESTful APIs for real-time product updates and secure payment processing.

- **Technologies:** Flutter, Dart, RESTful APIs, Firebase

Stock management

Developed a web application and backend to record and track all items in stock, including their descriptions, quantities,

- **Technologies:** React , NodeJs, RESTful APIs, MongoDB

OneLoan (iOS & Android)

Developed a loan app for iOS and Android, focusing on connecting users for loan services. Included features such as requesting, viewing loan status, repay loans.

- **Technologies:** Flutter, Dart, RESTful APIs, Firebase, NodeJs, mongoDB

EDUCATION

Computer Engineering

BahirDar University | July, 2019

CERTIFICATIONS

Software Engineering

ALX - Holberton University| 2021 - 2022

Mobile Application Development

Google Developer Group | 2021-2022

TECHNICAL SKILLS

Languages and Frameworks: Dart, JavaScript, NodeJS, NextJs, React, Flutter, Firebase, HTML, CSS

Flutter state management: Provider, BLoC, GetX

Databases: MongoDB, MySQL, Firebase Storage, Firestore

CI/CD Tools: CodeMagic

Automation/Testing: TestFlight

Version Control: Git, GitHub

RESTful APIs: Integration and Development

Project Management Tools: Clickup, Monday, Trello

Other skills: AppStore, PlayStore, Visual Studio Code, XCode, TestFlight
